Something New!

Opalite lining in refrigerators is something new. This lining is opal glass one half inch thick and snow white, it looks like marble. The walls and bottoms are solid slabs of this opal glass which makes it much better than the white tile, leaving no joints to fill with germs. They are the most sanitary refrigerators made and will last a life time. They have nickeled wire shelves, nickle trimming, locks and hinges. All wood work has round corners and they are elegantly finished.

If you want a high class good refrigerator you will find we have the best line shown in the city.

Sitka Refrigerators, Opal Glass lined, 110 pound ice capacity for only

ciation by Mr. Camp. It is the northeast quarter of the northeast quarter of section 14, township 18, range 9 east.

E. P. & S. W. Interested. The expenses of the wel so far have

been light. The actual drilling cost was stated Friday afternoon by Mr. nock, of Alamogordo, who was the only citizen from that place in attendance, to be about \$800. The material for the drill stem, was stated to be about \$1100. The coal for the drilling work, three cars, has been donated by the Southwestern railway, which has also suppilled 780 feet of casing.

Experience of the Drillers. Drilling work was first commence on Jan. 15, and proceeded, with but few interruptions, until March 24, when the tering the hard blue shale rock, it was decided to pull the drill point up for sharpening, and it was raised 40 feet. At that functure, the stay bolts, holding the crown sheets in the boiler, blew lly suspended. The boiler was repaired on March 28, and on March 29 an at-

By this time the quick sand had drifted to the 600 foot level, in around the drill stem, and the engine was not equal to the task, the sand having formed the drill stem was too great to permit its being drawn out of the well, the drilllers then installed a one and onequarter inch pipe in the well outside of the drill stem and began forcing the sand packed up, using 200 pousd wa-

By April 14 the sand was reduced to foot level, and a second attempt was then made to pull the drill stem and point from the well, but the stem was pulled in two, 140 feet from the surface. It was joined by a fishing spear and another attempt was made to lift the point. The engine, however, was not equal to the task.

By this time, the sand had again filled the drill hole proper to the 586 level and again the water pressure system was installed to force the sand up on the outside of the drill stem to the surface. On Friday afternoon the unobstructed passage down the drill hole measured the same, 586 feet. Work was again commenced this morning. The well to a depth of 650 feet, orignally measured nine inches in diame-

was cased with eight inch pipe. From the 650 foot level, the balance of the inches.

The drill used was of the rotary style, and this is also true of the inch and one-quarter pipe down through which the water is forced by pressure to wask

That the sand which has caused trouble in the well, drifted in from a 560 foot level, is the opinion of E. A. Mayo, notwithstanding the fact that the log of the well, between the 285½ and 598 foot levels. feet levels, records gumbo only. Mr. Mayo, however, asserts he was in

No Cure-No Pay

We will not give you a lecture on the wonderful curative powers of electricity, but if you have Rheumatism, nervous headaches or other nervous ailments or anything wrong with stomach, liver or kidneys, go at once to your druggist and get a pair of ELECTROPODES.

We don't simply guarantee they will cure you, we still do better than that. To insure you against any uncertainty, we have arranged with your druggist to sign a legal, binding contract with you, agreeing to return the money if they fail to cure. You know your druggist you know his name on a contract makes you safe then WHY don't you try a pair of ELECTROPODES. If they cure, they cost one dollar; if they fail to cure,

If your druggist cannot supply you, send \$1.00 direct to the WESTERN ELECTROPODE COMPANY, 257 Los Angeles Street, Los Angeles, California, and they will see that you are supplied. Mention your Druggists's name

PERSONAL EXPERIENCE WITH TUBERCULOSIS El Paso Gas & Electric Co.

Afflicted with tuberculosis, I went to El Paso in 1908, supposing that the climate, alone, would cure me. It proved a costly supposition. It was only after making many costly mistakes, that I learned the way to health. That others may profit by and avoid my experiences, I have endeavored, in this book, to show YOU how you can carry into practice wherever you are the methods that the cure depends on. Read it; your physician will endorse it. Sent postpaid on receipt of 50 cents (silver or money order.) Address today Will M. Ross, 202 Herald Bldg., Stevens Point, Wisc.
